

pregnancy, birth & newborn photography

## *Capturing your family*

... is something you never, ever regret. Whether it's in the birth room of your first child, a newborn session or a family shoot, what you recognise afterwards is that the little people in your life change in an instant. I've never met anyone who has regretted capturing their child's cheeky 2 year old grin, their first cry or the little baby curls.

And maybe it's just my family, but I'm daring to say it's fairly common, that most of our photos are missing at least one family member (usually me!) Capturing that once in a lifetime moment and being together as a family is special. Unifying. Beautiful.

Have a look through the pregnancy, birth and newborn package options on the next 2 pages. If what you need isn't covered, get in touch. I can tailor make something for your family unit and make sure we capture what makes you, you.

Family session packages are also available.

## *Pregnancy, birth & newborn*

> Pregnancy

Includes |

- > 1x Cambridge/Hamilton location. (or outside the area on arrangement)
- > 45 minute session with your partner. Can include siblings.
- > Location scouting and wardrobe advice if required.
- > 10 edited high resolution digital images, with the option to view an extended gallery. Optional additional image bundles are available as extras.

\$475\* | or with addition of siblings +\$40 (family session style images included)

> Fresh 48 - New Baby Hospital / Birth Centre Session

Fresh 48 sessions capture all the precious (and often blurry) details that co-exist within those first 48 hours of life. A great way to capture siblings or grandparents first meeting your new little person, and can be done in the hospital, birth centre or comfort of your own home. Fresh 48 sessions are a great alternative to birth photography if you aren't sure of the idea of someone else being in the birth room, yet want the journalistic moments of what your baby's first day looked like.

> Includes 15 edited high resolution digital images, with the option to view an extended gallery. Optional additional image bundles are available as extras.

\$550\* (+ travel)

> Birth Photography

Is currently on hold while my children are young due to the on-call nature; but will be offered again in 2025.

### > **Newborn Lifestyle Session (in your home)**

In home newborn shoots are a lovely way to capture your new baby in a relaxed environment, and mean you don't have to leave your own 4 walls! Lifestyle shoots are about capturing the essence of your family in your home and document those first days with a newborn in a real and beautiful way. A lifestyle session captures a mix of your child in their bassinette, you caring/ snuggling with baby, feeding, and some natural shots of you and any siblings bonding and spending time with your child. Lifestyle sessions take a more story-telling, documentary style approach, while focusing on the sweetness of the new life in your family. The look and feel of your gallery will be determined by the light and style of your home. Good natural window lighting is always important..

Includes |

- > Pre session consult and prep guide.
- > 1-2 hours shoot time in your home.
- > 10 high resolution, digital images.
- > A gallery of beautifully edited high resolution images to select from. Optional additional image bundles are available as extras.

\$550\*

### > **Newborn Studio Session**

Posed studio sessions focus on the beauty and size of your tiny newborn in a more stylised setting. Studio sessions offer a professional, natural, well lit studio space where we focus on a series of natural studio beanbag images of your sweet new tiny human. Parent and sibling studio imagery is also included. Your baby must be 6-14 days old for this session. (Front cover images are indicative of a typical Studio Session)

Includes |

- > Pre session consult and prep guide.
- > Approx 1.5-2.5 hours session time.
- > 10 high resolution, digital images.
- > A gallery of beautifully edited high resolution images to select from. Optional additional image bundles are available as extras.

\$660\* (Hamilton studio location, prior bookings essential)

## > Outdoor Newborn Session

Newborn sessions don't have to be inside! If you would like to combine a family session feel of the outdoors with a special focus on your newborn - the results can be stunning.

I will still focus on capturing the little details of hands and feet and baby details, while your little person is snuggled in your arms. These images capture your family together in a natural and authentic way.

Includes |

> Pre session consult and prep guide.

> 30-45 mins session time

> 10 high resolution, digital images.

> A gallery of beautifully edited high resolution images to select from.

Optional additional image bundles are available as extras.

\$455\*

## Prints

The above packages are inclusive of digital images only. Prints can also be ordered and are produced on beautiful, high quality pearl or matt photographic papers. These can be added as prints or framed images to any digital package. Enquire at time of booking for a full pricelist.

---

> All packages include editing of images + high resolution digital images with full rights of use (they are yours to privately print/use). The best images are chosen at my discretion, and you will be supplied a gallery to select from. Additional images are available for purchase within image bundles. Your own children (siblings) are included in lifestyle packages. Extended family members may be added to packages but may incur additional cost.

As newborns are easily unsettled and calm relaxed environments produce the best results, feel free to discuss the number of people that will attend shoot at time of booking.

> Pregnancy Shoots | It is great to discuss the type of location you have in mind for your shoot. If you have a spot picked out already, it's great to see some images of the area before the shoot. Or I can arrange a location for you.

> \*Travel outside of the Cambridge area incurs a travel cost of \$1.20 per km.

\*\*5% discount applies to bookings of 2 or more sessions booked together. Prices quoted are valid for 30 days.

## Questions

### HOW DO WE BOOK OUR SESSION?

Once you are happy with a photoshoot package (or we have discussed an alternative package) you'll just need to complete a booking form and deposit a \$150 booking fee. The completion of both will secure your session. The booking fee is non-refundable, but you may transfer it to another date if available. (I apologise, Saturdays are unavailable for pregnancy and newborn shoots.)

### HOW WOULD YOU DESCRIBE YOUR STYLE?

While I love making sure you have beautiful photos to take home where everyone is looking at the camera, my real passion is capturing authentic moments, expressions and relationships. Capturing real life. A nurse's amazement at a baby's birth weight, a mother rubbing her stomach and wondering at her newborn child, the emotion a father has as he supports his partner through birth. Depending on the package you choose, often there is the opportunity to have both - which is important. The journalistic capture of moments as they happen and the moment I get to shuffle you into a better position and remind you to take your sunglasses off. This will give you a range of photographs to take home that capture the essence of the moment and your family.

### WHAT SHOULD WE WEAR FOR PREGNANCY/NEWBORN SESSIONS?

Something you feel comfortable in! You want to be able to be yourself, so choosing something you feel good in is a must. Pregnancy photos look great in clothing that accentuates your beautiful baby bump, so don't be afraid of clothing that is fitting around your tummy. Avoid all-black where possible as this can hide the shape of your beautiful baby. Specialised pregnancy dresses are available online for purchase and rent for stylised photography should you be interested. ([lendmethedress.co.nz](http://lendmethedress.co.nz) is a great option)

### BIRTH PHOTOGRAPHY. WHAT DO I NEED TO KNOW? IS IT AWKWARD?

Not at all! As a mum to three gorgeous little humans, I've been to the birth room myself and know what to expect. Nothing is going to shock me or make me feel awkward, and know that I'm there mentally giving you high fives the whole way through! I will blend myself into the background as much as possible so you don't even know I'm there. However, it is good for us all to chat to your midwife or LMC before the birth so we can all be on the same page. Also, at the time of the birth itself I do require some light to be able to capture the moment in a clear enough way. Often birthing rooms have lights turned right down which is great, but if you want your birth captured in full, prepare to have a little light if your baby comes during the night - or you can request flash photography.
